MUSICVAULT

THE ULTIMATE MUZIC PLAYER

The USB 2.0 drive bay easily connects to your PC or MAC.

Full sized connectors give you switched line level outputs. They can be connected inline with existing equipment such as a CD changer. SPIDIF optical output, transmitter antenna and 2 power connectors for car installation or wall adapter. PDA and future communication connectors.

Using a Palm PDA as the player interface, the **MUSICVAULT** lets you take control of your muzic collection. Using the PDA buttons, touch screen or handwriting recognition, the PDA will get you to the song or album you want instantly. Now you have a reason to own a Palm, and with it you get all the other great PDA functionality.

PLAY screen gives you the standard controls plus jump instantly to any part of the song using the progress bar. Total and played time, title, artist and album info. Preset and custom EQ controls.

BROWSE screen gives you instant access to all of your albums. Browse directories and view track ID3 info. Sort alphabetically, or jump directly to a name using the Palm's handwriting recognition.

PLAYLIST screen lets you manage your custom playlists. Your playlists will let you have the perfect set of muzic ready for any occasion.

OPTIONS screen lets you change the FM radio station. Backlight control, track view controls.
